the food markets of barcelona host thousands of customers daily from tourists eager to sample fresh fruits and grilled seafood to

neighborhood cooks in search of high quality ingredients while other countries experienced major shifts away from the public market model in the twentieth century barcelona s food markets remained fundamental to the city s identity economy and culture montserrat miller s feeding barcelona 1714 1975 examines the causes behind the extraordinary vibrancy and tenacity of the barcelonan market system miller argues that recurrent revolutionary uprisings in barcelona beginning in the mid eighteenth century forced ongoing collaboration between the public and private sectors to ensure adequate and effective food distribution municipal support permitted small scale food sellers in barcelona to survive in a period more commonly characterized by increasing capitalization in food retail while the importance of food markets to barcelona s social networks enhanced vendors ability to recognize and adapt to changing customer demands in addition a high number of stalls owned by women contributed both to the financial well being of vendor families and to the sociability patterns that placed neighborhood food markets at the center of daily life in the city the shared commitment of vendors shoppers and government officials to a market model of food sales created the lasting and unique market system that persists in barcelona to this day drawing from extensive archival research and numerous interviews with individuals at all levels of the market system feeding barcelona 1714 1975 is the first detailed history of the historical and social influences that create urban food markets

a century ago only local charities existed to feed children today 368 million children receive school lunches in 151 countries in programs supported by state and national governments in feeding the future jennifer geist rutledge investigates how and why states have assumed responsibility for feeding children chronicling the origins and spread of school lunch programs around the world starting with the adoption of these programs in the united states and some western european nations and then tracing their growth through the efforts of the world food program the primary focus of feeding the future is on social policy formation how and why did school lunch programs emerge given that all countries developed education systems why do some countries have these programs and others do not rutledge draws on a wealth of information including archival resources interviews with national

policymakers in several countries united nations data and agricultural statistics to underscore the ways in which a combination of ideological and material factors led to the creation of these enduringly popular policies she shows that in many ways these programs emerged largely as an unintended effect of agricultural policy that rewarded farmers for producing surpluses school lunches provided a ready outlet for this surplus she also describes how in each of the cases of school lunch creation policy entrepreneurs motivated by a commitment to alleviate childhood malnutrition harnessed different ideas that were relevant to their state or organization in order to funnel these agricultural surpluses into school lunch programs the public debate over how we feed our children is becoming more and more politically charged feeding the future provides vital background to these debates illuminating the history of food policies and the ways our food system is shaped by global social policy
